

## Early Fall Preventive Measures

Fall is also a good time to wash and seal your deck if you didn't get a chance to in the spring. The point is to do it when temperatures are mild.

### Otherwise, to keep your deck in good shape:

- Trim nearby bushes and trees. They need to be at least 12 inches from the deck to slow mold, moss, and rot.
- Don't let leaves and other debris pile up in corners.
- Move planters, chairs, and tables occasionally to avoid discoloring the decking. Keep nearby gutters and downspouts in good repair.
- Make sure to sweep off your entire deck before 1<sup>st</sup> snow fall.
